DURABESTOS—The Durable

ASBESTOS-CEMENT SHEETS & SLATES

DURABESTOS—the Durable, Asbestos-Cement Sheets for Walls and Ceilings; made in Slates and Shingles for Roofing.

The maximum efficiency is not only satisfaction, but an absolute necessity in these times for Buildings—Bungalow Homes, Farm Buildings, Workshops, Factories, Garage, Stable or Boatsheds, a building for profit or pleasure must be of worth.

Durabestos will give you that efficiency in strength, safety and economy.

Standardization and efficiency are both fully comprehended in the *Durabestos* Works; standardized, a word that carries much of the worth that is found in the Wunderlich products, for, when a builder buys *Durabestos*, he knows that he is going to use a standardized material.

Durabestos—the Durable, is made from the indestructible mineral-fibre Asbestos—the most efficient Insulator. It is thoroughly incorporated with tested high-grade Australian Cement, layer upon layer builds up the sheet, which is submitted to powerful hydraulic pressure to form the fine surfaced, even graded finished *Durabestos* Sheet.

Throughout the whole service the standardization of materials and work is supervised by a staff of trained technical experts which guarantees to the user material that in its many forms as Roofing and Walling Sheets can be relied upon as the most practical for building uses.

In every form and every problem of building *Durabestos* is here to meet your wants, and solve the problem with economy, absolute safety from fire, durability, proof against all weather and indestructible by vermin or white ants.

Durabestos—the Durable is the original Australian hydraulically compressed Asbestos-Cement product; when ordering be sure you secure the *Durabestos* Sheets.

Durabestos Walls and Ceiling

The Kitchen

A problem confronting many householders is, how to make the kitchen clean and convenient for the day's work? It is solved by the use of *Durabestos* for Walling and Ceiling. The result of which is even temperature and clean surfaces. *Durabestos* can be painted or the natural surface cleaned with soap and water. *Durabestos* (Asbestos) is the complete insulating material.

Durabestos Walls and Roofing

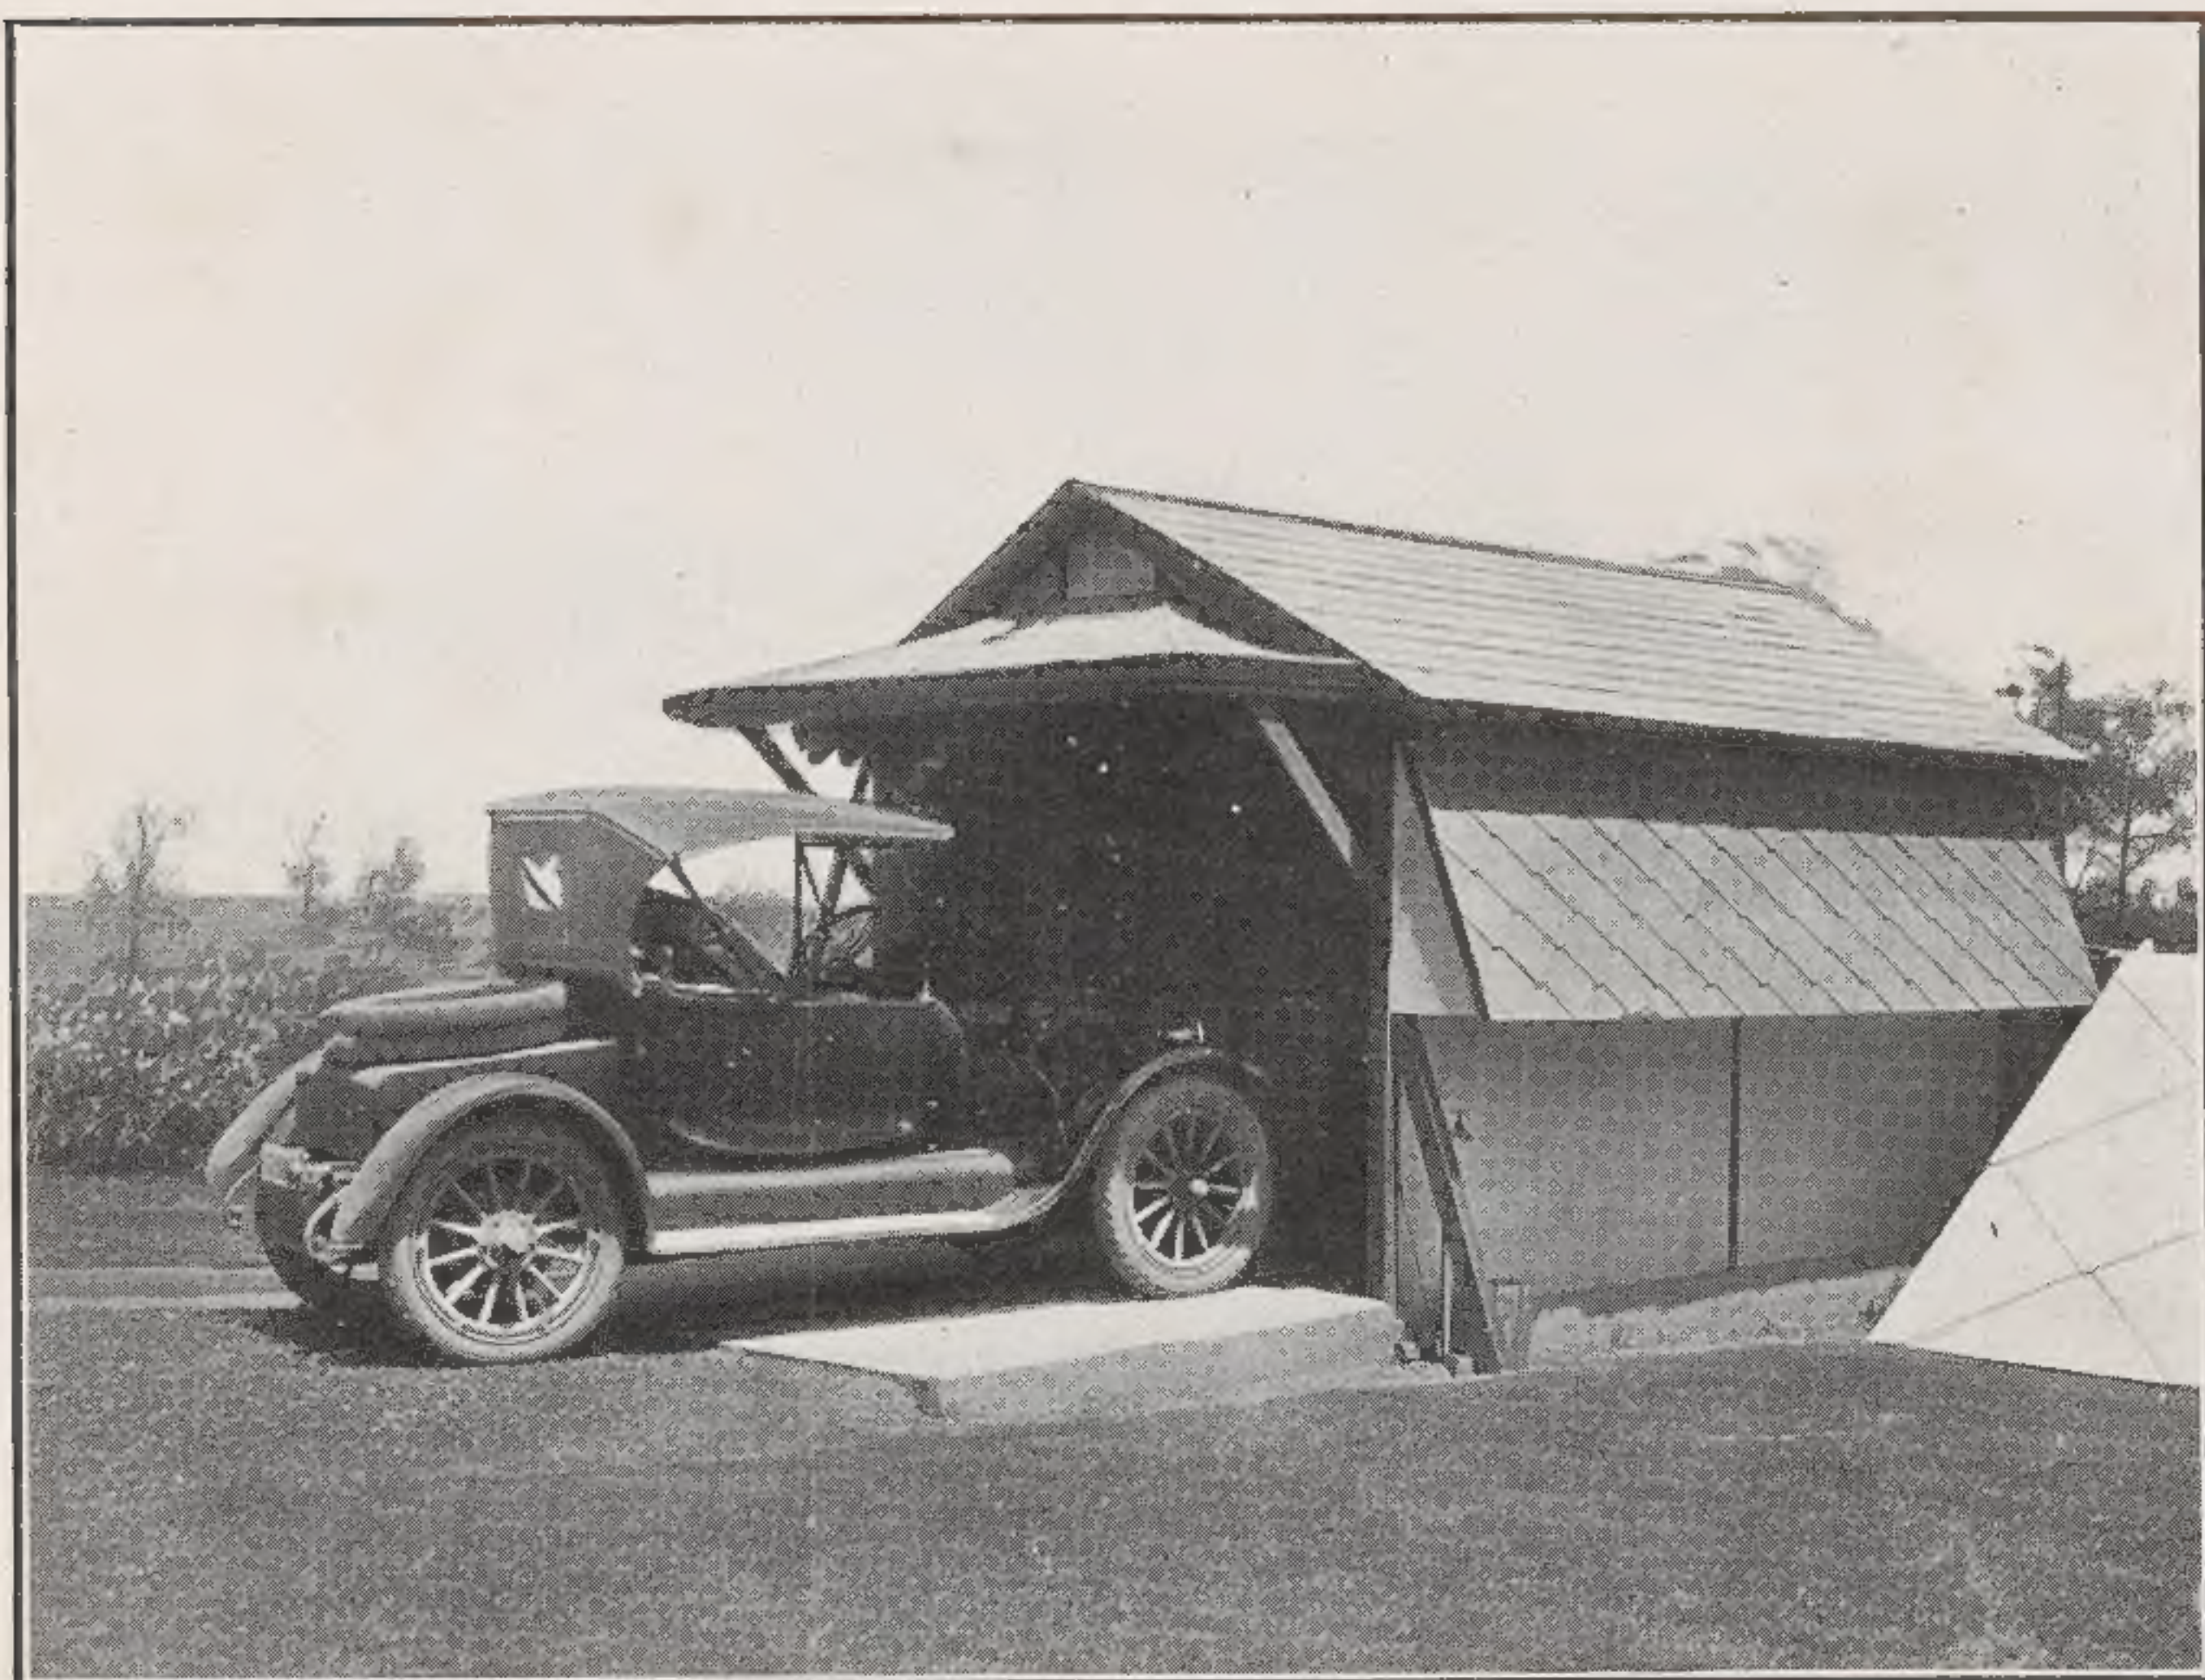

Schools and Public Halls, Pavillions, Boathouses

Durabestos in its useful stock size sheets (see table page 11) is made to suit all purposes for buildings exposed to hard usage and fire-risks, it is the indispensable material—it is safe and much lighter to handle than other building material—it becomes stronger with age, but at the same time does not lose its elasticity—it does not split, warp or crack—architects favour it on these points alone.

Durabestos Homes — Easy to Erect

Homes of reliable and sturdy construction. *Durabestos* Sheets can be fixed by any tradesman. With a sharp blow of the hammer nails may be driven through it, $\frac{3}{8}$ inch from edge without fracture; it can be cut with a saw, or a deep line cut with a chisel and snap off over edge of a piece of timber. It can be joined and fitted without any special knowledge, does not warp or shrink; useful for door panels, cupboards, partitions, etc.
